KRISHNAPRIYA VENKATAKRISHNAN

Web Developer

I began my career as a T24 developer at Temenos India Private Limited, a banking software company, where I honed my leadership and collaboration skills by working closely with cross-functional teams to consistently deliver projects ahead of schedule. After relocating to Stockholm in 2023, I embraced the opportunity to experience new cultures and reflect on my career goals. This transition inspired me to shift my focus to front-end development, with a long-term ambition of becoming a full-stack developer.

Today, I specialize in building clean, responsive user interfaces using React, Next.js, and MongoDB. I'm passionate about thoughtful UI/UX and continuously expanding my skill set with tools like GSAP to craft dynamic and engaging digital experiences. I'm eager to bring my problem-solving mindset and creative approach to impactful web projects.

CURRENT KEY PROJECTS

PROJECT: DEV OVERFLOW

DESCRIPTION:

A full-stack Q&A platform inspired by Stack Overflow, built with a focus on user engagement and scalability. Users can securely sign in via email/password or social accounts, ask and answer questions, and upvote or downvote answers. The app features dynamic routing, search filters, and integration with the Arbetsförmedlingen API for job listings. The backend uses MongoDB for data management, with server actions and API routes for handling user interactions and data operations. The app also supports light, dark, and system theme modes, ensuring a flexible user experience.

TECHNOLOGIES

React, Next.js, MongoDB, TailwindCSS, OpenAI API, Arbetsförmedlingen API

Dev Overflow - Live Demo

PROJECT: LIVEDOCS EDITOR

DESCRIPTION:

A modern, real-time collaborative document editor designed for seamless teamwork and solo editing. Users can create, manage, and delete documents via a unified dashboard. Key features include real-time collaboration with live cursor tracking, access control for sharing documents (view-only or editable), and a commenting system for contextual feedback. In-app notifications keep users updated on document sharing and invitations. All changes, including comments, are synced across sessions using Liveblocks storage, ensuring a persistent and interactive editing experience.

TECHNOLOGIES

React, Next.js, TailwindCSS, Clerk, Liveblocks

LINKS

LiveDocs - Live Demo

PROJECT: 3D ANIMATED WEBSITE

DESCRIPTION:

An immersive 3D animated portfolio that begins with a loading page and transitions into a dynamic homepage featuring background videos with hover-triggered interactions. An animated image section creates the illusion of entering a new world, while a bento card-styled feature section incorporates tilt effects. The story section includes dynamic imagery, and a floating navigation bar with an audio feature enhances interactivity. Scroll-triggered animations provide a smooth and engaging user experience.

TECHNOLOGIES

React, GSAP, TailwindCSS
